Part3. Installation Guide

3.1 Hardware installation

1. Plug the USB phone to the USB interface in your PC. The installation will be finished automatically.
2. Check the installation of the hardware. If your operating system is

Windows XP, you could check it step by step :
[start]→[control panel]→[system]→[hardware]→[device manager]
If there is no question mark"?" or "!" under "Sound, video and game controllers", the skype phone has been installed successfully.

3.2 Software installation

Download the software named "USB Dialer" from our website www.echostore.com or download here: [USB Dialer](#).

The ICON of the UsbDialer

Run "USB Dialer".

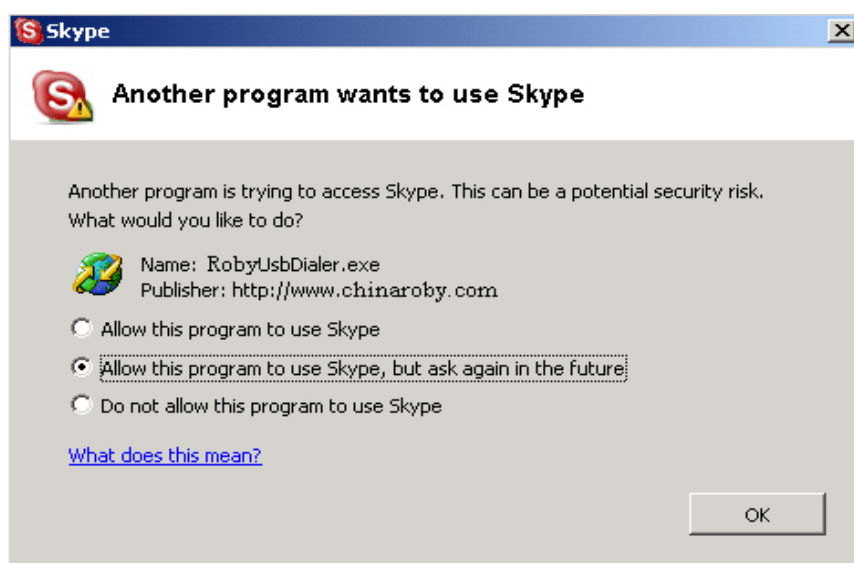

Double click the software(it will run), then select "Skype" , if you want to

use this phone other application such as MSN, SJphone, Net2phone, X-lite, Stanaphone, etc. you can select what you want from the list.

If your Skype is not running, the software would show "Skype is not running."

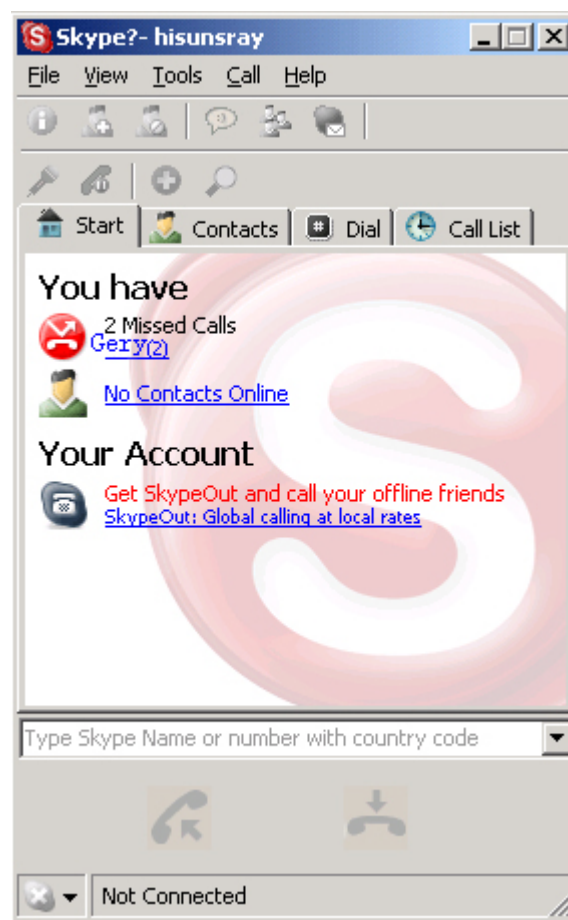

If your Skype is running, the following dialog box will appear:

In order to make the software to work with Skype, Please choose "Allow this program to use Skype" or "Allow this program to use Skype, but ask again in the future" option, and press OK.

When you want to make a skype call, run skype software first, if Skype is not active on the screen, press any DTMF key(such as 0-9 , * , #), Skype will

come to the foreground and the pressed key will be sent to Skype at the same time.

The keys on the USB phone:

"#": You can switch among the tab pages of [Start]、 [Contacts]、 [Dial]、 [Call List].

"0-9": Press the key of "0-9", you can key in the telephone number you want to dial.

Dial key:

If somebody in skype contacts is chosen, pressing the green key can make the call.

If nobody is chosen, pressing the green key will call the number you dialed.

If there is a coming call, pressing the # can switch to the active page, pressing the green key will accept the call.

Hangup key:

Pressing the "# " key to switch to the active page first and then pressing the red key will hang up the call.

If you want to choose your friend from [Contacts] or [Call List] to call, you can use the function key 1 and function key 2, then press the green key to dial call.
